## PROFESSIONAL SUMMARY

Computer science undergraduate with experience building REST APIs, NLP systems, and real-time applications. Delivered scalable solutions using Java, Python, and FastAPI, with hands-on exposure to AI and backend development. Proven ability to design efficient systems, optimize performance, and solve complex problems in fast-paced development environments. Passionate about leveraging technology to build impactful and user-centric solutions.

## TECHNICAL SKILLS

**Languages:** C, C++, Java, Python, Go (Basic)

**Web:** HTML, CSS, JavaScript, React, Node.js

**Backend & APIs:** REST APIs, FastAPI, Express.js

**Databases:** MySQL, MongoDB

**Tools & Platforms:** Git, GitHub, Linux, Docker, Google Cloud, microservices

**Core CS:** DSA, OOPs, OS, DBMS, CN, SDLC

## INTERNSHIPS

### Open Source Intern — AgenticGoKit | Remote

Feb. 2026 - Present

- Contributing to a Go-based AI agent framework; raised 2+ issues and delivered 2 merged PRs.
- Collaborating via code reviews and asynchronous discussions in a distributed open-source environment.

### Technical Intern — Department of Revenue and Land Reforms, Bihar | Remote

Dec. 2025 - Jan. 2026

- Designed “*Bihar Sugam Seva*”, a unified civic platform handling 1000+ records/day, improving service delivery and accessibility.
- Analyzed e-governance systems handling **1000+ records/day**;
- Detected ~**5–15% inconsistencies in data/metadata** of digitized land records.
- Proposed AI-OCR validation, DB optimization, and UI redesign to improve system reliability and efficiency.

### Full-Stack Development Intern — Bytical Solutions Private Limited | Remote

May 2025 - Nov. 2025

- Built REST APIs with FastAPI + MongoDB handling 1000+ requests/day, reducing response time by 35% and improving system performance.
- Implemented JWT authentication, strengthening security and access control.
- Developed autosave and live tracking features, increasing user engagement and reducing data loss.
- Built multilingual chat and voice features, improving accessibility.

## PROJECTS

### Feedback Management System | *HTML, CSS, JavaScript, Firebase*

📄 [GitHub](#) • 🌐 [Live](#)

- Problem:** Traditional feedback systems lacked anonymity, real-time insights, and structured analysis.
- Implementation:** Built a role-based web system using Firebase Auth & Firestore for secure, anonymous feedback collection with real-time processing and interactive dashboards with export features.
- Impact:** Enhanced feedback transparency, enabling data-driven decision-making.

### AI Skill Gap Analyzer | *Python, NLP, TF-IDF*

📄 [GitHub](#) • 🌐 [Live](#)

- Problem:** Candidates often struggle to identify skill gaps between their profile and job requirements.
- Implementation:** Built an NLP-based system using TF-IDF and cosine similarity to evaluate skill alignment between resumes and job descriptions, generating readiness scores and personalized recommendations.
- Impact:** Improved job readiness and skill alignment through targeted learning recommendations.

## EDUCATION

### Bachelor of Technology (B.Tech.) | Computer Science and Engineering

2023-2026

*Gaya College of Engineering, Gaya, Bihar, India | CGPA: 8.56 / 10*

### Diploma | Computer Science and Engineering

2020-2023

*Government Polytechnic, Muzaffarpur, Bihar, India | CGPA: 8.58 / 10*

## ACHIEVEMENTS & CERTIFICATIONS

- Solved **1000+ DSA problems** on [GeeksforGeeks](#) and [LeetCode](#) | Participated in **ICPC (2024, 2025)** and hackathons.
- Microsoft Certified:** Azure AI Engineer Associate.
- NPTEL:** Problem Solving in C, Programming in Java, Introduction to Machine Learning.
- Cisco Networking Academy:** Networking Essentials; Programming Essentials in C++.
