SUMMARY

Computer Science undergraduate with strong problem-solving abilities and a solid foundation in Data Structures, Algorithms, and Software Engineering. Experienced in developing efficient and scalable solutions, with proficiency in Java and Python. Skilled at writing clean, maintainable code and adapting to new technologies quickly. Seeking an entry-level role to contribute to organizational goals while continuously learning and growing in a dynamic environment.

EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science and Engineering

Gaya College of Engineering, Gaya, Bihar, India | Expected Graduation: 2026 | CGPA: 8.56 / 10

Diploma – Computer Science and Engineering

Government Polytechnic, Muzaffarpur, Bihar, India | 2020-23 | CGPA: 8.58 / 10

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, Go (Basic)

Web Technologies: HTML, CSS, JavaScript, React, Node.js

Backend & APIs: REST APIs, FastAPI, Express.js

Database: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Docker, Google Cloud

Core Computer Science: DSA, OOPs, Operating Systems, DBMS, Computer Networks, SDLC

PROJECTS

[Feedback Management System](#) | Tech Stack: HTML, CSS, JavaScript, Firebase | [Live](#)

- **Problem:** Traditional student feedback systems lacked anonymity, real-time insights, and structured analysis.
- **Implementaion:** Designed and developed a role-based web system using Firebase Authentication and Firestore to enable secure, anonymous feedback collection with real-time data processing. Built interactive dashboards with charts and export functionality.
- **Impact:** Enhanced feedback transparency, enabling data-driven decision-making.

[AI Skill Gap Analyzer](#) — Resume & Skill Evaluation System | Tech Stack: Python, NLP, TF-IDF | [Live](#)

- **Problem:** Candidates often struggle to identify gaps between their skills and job requirements.
- **Implementaion:** Built an NLP-based system that analyzes resumes against job descriptions using TF-IDF and cosine similarity to evaluate skill alignment and scoring.
- **Impact:** Delivered personalized recommendations to improve job readiness and skill alignment.

INTERNSHIP

Open Source Intern | [AgenticGoKit](#) (Remote) | Feb 2026 – Present

- Contributing to a Go-based AI agent framework; raised 2+ issues and delivered 2 PRs..
- Collaborating via code reviews and discussions in a distributed open-source environment.

Technical Intern | [Department of Revenue and Land Reforms, Bihar](#) | Dec 2025 – Jan 2026

- Designed a prototype for “Bihar Sugam Seva” – a unified platform for civic services, grievance redressal, and service delivery.
- Analyzed large-scale e-governance systems handling 1000+ records/day, identifying UI/UX and performance bottlenecks.
- Evaluated digitized land records, detecting ~5–15% data/metadata inconsistencies affecting reliability.
- Proposed solutions like AI-OCR validation, DB optimization, and UI redesign to improve system efficiency.

Full-Stack Development Intern | [Bytical Solutions Private Limited](#) | May 2025 – November 2025

- Built scalable REST APIs using FastAPI + MongoDB for real-time applications.
- Implemented JWT authentication & session handling, improving security and reliability.
- Improved UX with autosave & live progress tracking, reducing user friction.
- Developed features like multilingual chat, voice interaction, and recommendation logic.

ACHIEVEMENTS

- Solved 1000+ DSA problems across platforms like [GeeksforGeeks](#) and [LeetCode](#).
- Participated in ICPC (2024, 2025) and state/national-level hackathons, gaining competitive experience.

CERTIFICATIONS

- **Microsoft Certified** - Azure AI Engineer Associate
- **NPTEL** - Problem Solving Through Programming in C, Programming in Java, Introduction to Machine Learning
- **Cisco Networking Academy**- Networking Essentials, Programming Essentials in C++.
